EDUCATION

Georgia Institute of Technology, Atlanta, GA

Bachelor of Science in Computer Science: Systems Architecture & Media

May 2028

GPA: 3.61/4.0

RELEVANT TECHNICAL SKILLS AND COURSEWORK

Computing Languages and Technologies: Java, C, Python, HTML/CSS, JavaScript, Docker, AWS, Claude, Gemini, Copilot

Research and Design Software: ATLAS.ti, Figma, Adobe Suite, Google Suite, Microsoft Suite

User Experience Research Skills: Design Patterns, Survey/Interview Protocol Design, Quantitative/Qualitative Data Analysis, User Persona Development, Design Critiques, Functional/Nonfunctional Requirement Development, Sketches and Mockups, Low-Fidelity Wireframing, High-Fidelity Prototyping, Heuristic Evaluations, Usability Testing

Coursework: Object Oriented Programming, Data Structures & Algorithms, Computer Organizations & Programming, Systems & Networks, Design & Analysis of Algorithms, Computer Graphics, User Interaction Design

Honors: Georgia Institute of Technology's Dean's List (Fall 2024 - Spring 2026), National Merit Scholarship Finalist (50,000 applicants), Georgia Governor's Honors Program Computer Engineering Alumni (4,000 applicants)

WORK EXPERIENCE

Georgia Institute of Technology Library, Atlanta, GA – *Computing Support Technician*

May 2026 – Present

- Maintaining hardware/software in all departments, supporting 100+ workstations and all staff and student rental devices

Wellness Technology Lab, Atlanta, GA – *Qualitative Student Researcher*

February 2026 – Present

- Utilizing ATLAS.ti to conduct template analysis, assigning *apriori* codes to 600+ documents to aid further qualitative analysis

WELab Vertically Integrated Project (VIP), Atlanta, GA – *Student Researcher, Developer*

August 2025 – Present

- (EVAC+) Designed simplified intake survey based on FEMA forms and personas to create user requirements for development
- (AoA Facility Management) Developing high-fidelity prototypes that utilize automatic text parsing to organize and draw insights from utility bills and appraisal documents for 100+ parishes, displayed on a dashboard tailored for low-tech users

PROJECTS

Archdiocese of Atlanta Facility Management Software, Atlanta, GA – *WELab*

September 2025 – Present

Web application for low-tech users that keeps record of finances and building maintenance, securely powered by AI insight

- Utilizes Auth0 to register and authenticate users and limits AI-insight to utility bills, ensuring confidential data stays secure
- Implements TesseractOCR and pdfplumber for data entry and insight synthesis, streamlining the new user training process
- Designed a simple UI focused on intuitive use to minimize cognitive load and address unfamiliarity with automated systems

HoneyComb, Atlanta, GA – *User Interface and Experience Case Study*

January 2026 – May 2026

Wellness app focused on building sustainable financial management habits for college students and those new to finances

- Translated quantitative survey and qualitative interview data from 45+ respondents into user personas and requirements
- Documented iterative process from low-fidelity wireframes to interactive Figma prototypes, satisfying heuristic user testing

basil, Atlanta, GA – *HackGT Hackathon*

– September 2025

Intelligent ingredient tracking and recipe generation app that prioritizes earlier expiring ingredients to reduce food waste

- Utilized AWS Cognito for user creation, login, and data storage, enabling secure authentication and privacy for users
- Connected ReactJS frontend to Flask/SQLite backend and OpenAI API, to optimize real-time, low-friction recipe generation

Buzz Link, Atlanta, GA – *WebDev@GT*

September 2024 – November 2024

Website created to connect students within the Georgia Tech community utilizing peer-to-peer video and audio calling

- Designed UI/UX of the website to reflect other popular platforms, like Zoom and Discord, creating familiarity and ease of use
- Implemented user authentication using Auth0 and Firebase to allow users to log in and join chatrooms safely and securely

LEADERSHIP AND COMMUNITY ENGAGEMENT

GT Mechanical Keyboards Club, Atlanta, GA – *Finance Officer*

September 2024 – Present

- Plans, organizes, and advertises monthly meetings for 300+ in-person members and 900+ online members

Holy Cross Catholic Church, Atlanta, GA – *Troop Support Ministry Volunteer*

August 2019 – Present

- Prepares machine and hand-sewed prayer squares for care packages (1000+ squares, 300+ packages) for active-duty soldiers

ADDITIONAL SKILLS AND INTERESTS

Languages: English, working proficiency in Spanish

Interests: Graphic Design, Video Game Development, Software Development, Mechanical Keyboards, Crochet, Knitting
